As a web developer, I am driven by my passion for creating visually appealing and user-friendly websites. My creative mindset and problem-solving abilities enable me to tackle challenges effectively, constantly seeking opportunities to enhance my skills and expand my knowledge.

WORK EXPERIENCE

Associate Software Developer Acute informatics PVT LTD

12/2022 - Present

Ahmedabad

Achievements/Tasks

- I designed and developed Audit Software for banks using advanced technologies such as React JS, Typescript, Node JS, and Recoil. This software facilitates the auditing process by allowing a comprehensive examination of financial reports presented in annual reports. It ensures precision and efficiency in financial auditing procedures.
- I am currently developing a Loan Organization System (LOS) using React, Recoil, and TypeScript. This system handles the complete lifecycle of loans, from initial inquiry to disbursement. It incorporates features like CIBIL score integration, document analytics, and integration with a voice assistant for page navigation. The main objective is to create a robust solution that enhances efficiency and accuracy in managing the loan lifecycle.

EDUCATION

Front End Development TOPS Technologies

11/2021 - 10/2022
